sorona®AURA

sorona®AURA fibers consist of 37% vegetable components, obtained from renewable raw materials. Garments with sorona® Aura offer an eco-friendly alternative with outstanding breathability, lightweight comfort and efficient heat retention. sorona®AURA offers the perfect mix of sustainability and performance.

BIONIC-FINISH Water Repellency

Nature-inspired technology gives textiles water-repellent properties and is based on a technology that does not intentionally use fluorine-containing finishing chemicals. A special microstructure on the fibre surface helps water and aqueous soiling to bead up and roll off, while preserving the material's characteristic properties.

GRS Outer shell and lining 100%

The indicated percentage of this product consists of recycled polyester, certified according to the Global Recycled Standard (GRS). The GRS is a globally recognized standard that verifies the presence and amount of recycled polyester, ensures traceability throughout the entire supply chain, and includes additional requirements for environmental and social practices.
