

**Functional vest made of softshell**

Functional 3-layer-fabric with TPU membrane  
 Wind- and water-repellent (5,000 mm water column), breathable and permeable to water vapour (1,000 g/m<sup>2</sup>/24h)  
 Non-taped seams  
 Inside made of micro fleece, mesh lining at the front  
 2 zipped side pockets  
 Elastic drawstring with stoppers on waist  
 Zip at front lining for embroideries  
 JN136: Vertical breast pocket with zip  
 JN138: lightly waisted

**Fabric:** Outer fabric (330 g/m<sup>2</sup>): 95% polyester, 5% elastane

**Country of origin:** China

**Customs tariff number:** 62114390

**Care instructions:**

**Partner article:**

**Ladies' Softshell Vest**  
 Art-Nr.: **JN138**

**Softshell**

Softshell with TPU membrane consists of three layers. Due to the microporous TPU membrane as middle layer the material is water-proof, wind-proof and breathable at the same time.

**Breathable-Permeable to water vapour**

Functional textiles must have the ability to transport moisture from the skin to the fabric surface as fast as possible. Permeability shows how much steam in grams can evaporate on a surface of 1 m<sup>2</sup> within 24 hours. The higher this figure, the more breathable the textile is.

**Water column from 1.500 mm**

The ability to withstand water pressure without moisture penetrating into the material is given by the water column (mm). The minimum standard is a water column of 1,500 mm.
