

Professional softshell vest with high-quality features

- Durable and hard-wearing softshell material
- Wind- and water-repellent (2,000 mm water column)
- Breathable and permeable to water vapour (2,000 g/m²/24h)
- Water- and dirt-repellent thanks to BIONIC-FINISH@ECO
- Stand-up collar
- Shoulder area reinforced with CORDURA®
- Full-length under-panel zip with storm flap
- Zippered side pockets and breast pocket
- Breast pocket with flap, inner pockets
- Reflective details (without protective function/no PPE) on armholes and at the back

Fabric:	Outer fabric (320 g/m ²): 100% polyester Trimming: 100% polyamide
Country of origin:	China
Customs tariff number:	62114310

Features

OEKO-TEX® Standard 100 (15.0.70467)

OEKO-TEX® CONFIDENCE IN TEXTILES STANDARD 100 15.0.70467 HOHENSTEIN HTTI Tested for harmful substances. www.oeko-tex.com/standard100

CORDURA®

CORDURA® is a very sturdy, textured polyamide fabric, which is extremely tear- and abrasion-proof. Special yarns, specially developed weaving techniques, dyeing methods and additional textile finishing ensure that products with CORDURA® can be used as durable and comfortable workwear.

BIONIC-FINISH@ECO

BIONIC-FINISH® was developed, following the example set by nature, 'learning from nature'. The textile is protected against water and dirt by a very thin crystalline structure. BIONIC-FINISH@ECO protects man and nature.

Softshell

Softshell with TPU membrane consists of three layers. Due to the microporous TPU membrane as middle layer the material is water-proof, wind-proof and breathable at the same time.

Breathable-Permeable to water vapour

Functional textiles must have the ability to transport moisture from the skin to the fabric surface as fast as possible. Permeability shows how much steam in grams can evaporate on a surface of 1 m² within 24 hours. The higher this figure, the more breathable the textile is.

Water column of at least 1.500 mm

The ability to withstand water pressure without moisture penetrating into the material is given by the water column (mm). The minimum standard is a water column of 1,500 mm.
