#### Features

##### sorona@AURA

sorona@AURA fibers consist of 37% vegetable components, obtained from renewable raw materials. Garments with sorona@ Aura offer an eco-friendly alternative with outstanding breathability, lightweight comfort and efficient heat retention. sorona@AURA offers the perfect mix of sustainability and performance.

##### BIONIC-FINISH@ECO

BIONIC-FINISH@ was developed, following the example set by nature, 'learning from nature'. The textile is protected against water and dirt by a very thin crystalline structure. BIONIC-FINISH@ECO protects man and nature.

Certified by Ecocert  
Greenlife TE-00302043

##### GRS Standard

PET bottles are recycled into new fashion. Plastic bottles are crushed, melted down and spun into new yarns, some of which are used in production up to 100%. The Global Recycled Standard (GRS) stands for independently verified recycled materials, transparent supply chains and fair, environmentally friendly and health-conscious production conditions.

##### Breathable-Permeable to water vapour

Functional textiles must have the ability to transport moisture from the skin to the fabric surface as fast as possible. Permeability shows how much steam in grams can evaporate on a surface of 1 m<sup>2</sup> within 24 hours. The higher this figure, the more breathable the textile is.

##### Water column of at least 1.500 mm

The ability to withstand water pressure without moisture penetrating into the material is given by the water column (mm). The minimum standard is a water column of 1,500 mm.

##### Taped seams

To avoid moisture penetrating into the fabric, seams and stitches can get taped. Taped seams are 100 % water-proof.
