JN845 Workwear Softshell Vest - STRONG -

Professional softshell vest with high-quality features

Durable and hard-wearing softshell material
Wind- and water-repellent (2,000 mm water column)
Breathable and permeable to water vapour (2,000 g/m²/24h)
Water- and dirt-repellent thanks to BIONIC-FINISH®Water Repellency
Stand-up collar
Shoulder area reinforced with CORDURA®
Full-length under-panel zip with storm flap
Zipped side pockets and breast pocket
Breast pocket with flap, inner pockets
Reflective details (without protective function/no PPE) on armholes and at the back

Fabric:	Outer fabric (320 g/m ²): 100% polyester Trimming: 100% polyamide
Country of origin:	China
Customs tariff number:	62114310

Care instructions:

 dark-green/black (554U, blackC)	 navy/navy (296C)	 red/black (193C, blackC)
 royal/navy (285C, 296C)	 stone/black (7501C, blackC)	 white/carbon (white, 447U)

Features

OEKO-TEX® Standard 100 (15.0.70467)

OEKO-TEX® CONFIDENCE IN TEXTILES STANDARD 100 15.0.70467 HOHENSTEIN HTTI Tested for harmful substances. www.oeko-tex.com/standard100

CORDURA®

CORDURA® is a very sturdy, textured polyamide fabric, which is extremely tear- and abrasion-proof. Special yarns, specially developed weaving techniques, dyeing methods and additional textile finishing ensure that products with CORDURA® can be used as durable and comfortable workwear.

BIONIC-FINISH Water Repellency

Nature-inspired technology gives textiles water-repellent properties and is based on a technology that does not intentionally use fluorine-containing finishing chemicals. A special microstructure on the fibre surface helps water and aqueous soiling to bead up and roll off, while preserving the material's characteristic properties.

Softshell

Softshell with TPU membrane consists of three layers. Due to the microporous TPU membrane as middle layer the material is water-proof, wind-proof and breathable at the same time.

Breathable-Permeable to water vapour

Functional textiles must have the ability to transport moisture from the skin to the fabric surface as fast as possible. Permeability shows how much steam in grams can evaporate on a surface of 1 m² within 24 hours. The higher this figure, the more breathable the textile is.

Water column of at least 1.500 mm

The ability to withstand water pressure without moisture penetrating into the material is given by the water column (mm). The minimum standard is a water column of 1,500 mm.
